wit and wisdom from Punch; and, when he thinks it good enough, makes use of the thunder of the Times.

The steamship has brought Europe, Asia, and Africa, into our meighborhood; and will grenty moliphy our connections, as Merchania, Travollers, and Politicians, withall paint of the world; so that much more than ever it now becomes every intelligent American to be informed of the condition and change of foreign countries. And this not only because of their neaver connection with ourselves; but because the nations scene to be hastening, through a rapid process of change, to some new state of things, which the merty population prophet cannot compute or foreste.

Congraphical Discoveries, the progress of Colionizaton, (which is extending over the whole world;) and Voyages and Travels, milord favorite matter for his selections; and, in general, the editor systematically and very felly acquaints his readers with the great department of Poreign affairs, without neglecting our own.

While the Living Age is desirable to all who to keep themselves informs of of the rapid progress of the ciovernative. Statemen, Divines, Luxvyers, and Physicians—to men of lusiners and used of lessure,—it will be sound to be equally attractive and useful to their wiver and children. It is unitypensable to every well-informed family. We say indispensable, because in this day of cheap limitants it is not possible to grand a small the morals, in any other way than by furnishing a sufficient graphy of a healthy character. The metalla dimental and moral appetite must be grantified.

Communition is the great curse of our northern atitude. It is the blight of duncatic folicity and the despoiler of learning. It rots the check of its healthful bloom, the mind of its, serveity, and the eye of its brilliance. It wastes the form, dims the intellect, and phinges its victim into an early grave. The young and old, the servens and the gay; the city belle and the country lass, are alike its new wastes the training and research furnished us weapons to laid defiance to this "Dweler of the Threhold!" He merits the apphase and gratitude of ages—he shall have ours, at least.

The occasional use of medicine is a matter of necessity with the great anajority of mankind. Whatever, therefore, is done to remove its disagreeable associations, in a public besefit. The value of Wright's Indian vegetable Fills is well understood, knoccent and offencious, free from minerals of every description, and ndapted to the circumstances and condition of life, they are extended beyond all other rensedies, as the greatest denily medicine of the day. The frost covering is an addition intended unvely to concerd that racte and smell. These Fills will also continue to be prepared without the treaties, as heavefore, so that all who prefer them in these original stating may still be accommodated.

GENERAL DIRECTION.—The onlinery dose for a grown person is from two to four Fills; but in cases of violent pain, in any part of the day, the medicine should be taken in large dueses, and respected every night on going to bed, (or oftener if the suffering is great), until pain, or distress of every kind is removed; after which, the medicine should be taken merely with a view to keeping the booky to a state of sound health.

SATURDAY MORNING, DEC. 7, 1850.

&-Being in Providence, it few days since, we heard of a house where the "spirit al knockers" had tale i up their accasional abode, on rather, where they made frequent visitations. Actuated by curiosity, we went to the house, not forhe purpose of summoning up from the yet been invaded by militarite, steamgreat deep of futurity our particular goardian apirit, or to invoke from the realm of the spirit world any one protecting deily to watch over us through this life, in our pilgrimage of joy and actrow. No not for any of these visionary purposes did we make the viet which we are now about to describe,because we have no faith in guardian angels, protecting spirits, or any such fincies; we beleive man's conscience to be his only guardian spirit, and that is quite sufficiently a guide and watch for him, if he but listens to its whispering admonitions.

We are hir from being credulous or superstitious; and if we were a little romantic in life's younger morning, before the cream of youth had been disimpated we have passed through too many stern realities since, to have any of those functial emotions still alive in our heart. We have seen enough of men, and we have become sufficiently ecquainted with life's varied events, to look at all things with a calm eye, cool reason and a somewhat matured judgment. We make these preliminary remarks by way of preparing the reader for what is to come.

We found the young lady who officeated as the "hiedium," at a small, plain house in the city; the is apparently about Iwenty years of age, modest and very becoming in her conduct; apparently simple-hearted and innocent in all her thoughts and feelings. From what we know of human nature, we should unhesitatingly say that she is incapable of anything like weighty deception ; and by this we mean that we do not beleive that she has the capacity to concuive of a plan and carry it into successful execution to such an extent as to deceive those who have most shrewdly scrutinized all that appertains to these "rappings," as far as human observation can penetrate, and as far as man's ingennity can be exercised.

Thus much for our opinion of the character of the "medium" and her human agency in the matter. This is emply our unbiased opinion, and we are satisfied that any one else, no matter how much they might be prejudiced against the grappings," or howmuchsoever they might be inclined to denounce them as a humbug of some kind,would inevitably come to the same conclusion in regard to the young lady in A small round table was placed in

the middle of the room; we took this up and examined it most thoroughly, and found it to be a simple, plain table, about which there was so kind of machinery or fraps, and no mystery what ever, which it was possible to discover. We took up the carpet and examined the floor, and found nothing unusual there, and no connection between the table and carpet and floor, except that the former stood upon the latter. This over, we sat down by the table, and the young lady scated herself near it. but did not touch it in any way whatever. She sat silent for about five minntes, looking like same one engaged in deep thought; after this lapse of time, there was a slight scratching, apparently under the top of the table, which very nearly resembled the noise made by a death-tick which is often heard in the walls of old houses ; this continued for a few seconds, rather faintly, when it changed to a sound quite resembling the noise made by striking the fingermail foreibly upon a table. This lasted for a few minutes, when the young lady enquired if we had a guardian spirit and if it was present—there was a ticking sound, like that we have already described, although the tone was different. Sife asked if it would converse with us; there was a decided " rap."-She then told us to ask such questions as we desired, as the spirit would ans wer us and converse by "raps." After some time, it munifested a willingness to disclose its name. We called the alphabet, and as we came to the letter I, it rapped; we called again, and r rapped at A ; again, and it rapped at M; again, and we got E ; again and we re ceived S,-making the name James It then gave our surname as its own and claimed to be our consin. It said that it lest this earth between four and five years ago, and that it had known us on earth. But we were unable to obtain any response as to whether we mew it, or as to its own age, at the time al dis departure from this material offer A then kept up a continual and loud scapping for some seconds, when we en-

quire i if it wished to communically anything to us; it replied in the alarmative, by raps to the alphabet, and we at once commenced, because we were quite anxious, if possible, to obtain the latest despatch from the world of spirits for the next issue of the News; and if. our guardian spirit and relative, James, -bnoqserio au an tac ou récrespondest in another world, for the purpose of imparting the latest intelligence from thence, we were determined to cultivate its acquaintance, and afford all the fitcilities in per power, -for we know that such news from a realm which has not boats, mailt and the Magnetic Telegraph, would be of the highest imporrance to our renders. We were under the greatest excitement, expecting that James, from his loud and almost fearful rapping, would announce to us the location of the infernal regions, a full account of some transactions revolution in another world, or comething of that kind,-when he spoke as follows.-" I LOVE YOU VERY, DEARLY-DO YOU LOVE ME DEARLY ?" We smiled, and answere it." Oh, yes, Jimmy, we love you very much." We should judge that he was pleased with our manifestation of affection, because he rapped much more mulibly and responded much more readily after this-James could not or would not tell whether there was any one in the world of spirits whom we had ever known on earth; the "medium" minimoned up another spirit and sent it on a voyage of discovery to flud out who James was and what was the matter with him, and

why he did not report himself more fully and intelligibly. After a little time this spirit answered back that James was a young shaver, and that he did not know how to give the information which his relative desired. It stated also that Junies was in the record sphere. and therefore that he could not converse as well, and did not know as much, as he would had he been in the sixth sphere. We began to be rather ashamed of our guardian spirit, when we thought that he had been over four years in that realm, and had only got as far as the second sphere; we were somewhat relieved, however, when we accertained, that he was a youngeter, and conse-

quently concluded that, he could not

serated along very rapidly.

James spelt out our name in full, and then said that we were generally called Henry, by our intimate friends,-which is very true. The little fellow did not appear to have anything else of importance to say, and, as he claimed relationship with us, we had some consideration for the youngster, and concluded to let him rest. Before leaving, however, we asked him to rap as loud as he could, which he did in a manner that made the sounds heard very plainly all over the room. We then asked Jimmy if he would please move the table, as a further evidence to satisfy his unbelieving cousin, as to his ability to communicate with earth. He replied that he would. The employer were louder, and louder, and londer, and then the table slightly moved, as if some one was making a strong effort to etart it; directly the table moved quickly along on the floor, full six inches. After this it was moved more than a dozen times, indifferent chrections quite six inches each time. Thinking that the young genius must be weary after such a demonstration of his spiritual power, we concluded to let him repose,-and accordingly left the house. We should say that we have as knowledge of any

We heard the rape most distinctly for a space of two hours, not only on the table, but in other parts of the room, according as the spirit was bid to go. We saw the table move six inches, more than a dozen times. These things we know, because we heard and saw them, and could not be mistaken about them; consequently, there we belgive. As to what consed all this, we are entirely junorant, and cannot even conjecture. been done by the girl's human power, because we alfould have detected her, had this been the case. We do not beleive in the operation of spirits on earth, consequently we are not prepared to acknowledge their agency in the business. We frankly admit that we are perplexed and bothered about the matter. It it is possible for all this to be the work of human power, whoever does it, is worthy of the Devil's own throne, in his own realm, for these operations would surpass even his most mysterious machinations

We ask others to go and see for themselves, and the result, we are confident will be the same as it has been in our own case. We may laugh at each other if we please, but as surely as a person sees for kinself, he also is doomed to be laughed at, because he swet admit what he has seen and heard, and yet he can give no explanation of it. We shall leave the subject now with the single remark that there is strong reason to beleive that a "medium," or young lady from Providence. who possesses this mysterious power, will visit Newport in a short time, and then such of our citizens as desire, will have an opportunity of witnessing for themselves all that we have seen and heard and described, and perhaps even

Mr. Robinson offered a resolution that select Committee he appointed to take into consideration the Bounty Land set, passed last September, giving lands to those not heretofore provided for, and report on the bill or otherwise, what further legislation is necessary to secure the prompt execution of the act within a reasonable length of time-whether, the existing regulations of the Commissioner of Pensions are conformable to lawwhat time it will occupy to execute the same, and whether an additional clerical force is necessary. He said that about twenty thousand applications were now on file, and not over twelve or thirteen hundred have been registered. After being registered, they have to be sent to the I hird Auditor's, that he may examine the rolls to see whether the declarations correspond with them. At this rate, it would take four or five years, and not one-lenth of the applicaions have been yet filed. The Secretary thinks the number will reach a quarter of a million. He further pressed the importance of investigation and increased business facilities, to carry out the law promptly. If this was not done, the act had better be repealed.

Their power over the above discases is not excelled—if equalled—by any other preparation in the United States, as the cures attest, in many cases after skilled physicians had failed.

These Bitters are worthy the attention of invalids. Possessing great virtues in the rectification of discasses of the Liver and learn glands, exerting the most searching powers in exclusers and selection of the digestive organs, they are withal, safe, extain and pleasus.

Char, Robinson, Est., Paston, Jid., in a letter of Dr. Jackson, January 9, 1850, said.

My wife and myself have received more henced from your medicine than any other we have nyft lron your medicine than any other we have ever taken for the Dyspepsia and Liver disease."

"The Tenth Lexion," published at Woodstock Va., January 10, 1830, said—"A GREAT MEDICINE."

"The Tenth Legion," published at Woodstock Va., January 10, 1850, said—
"A GREAT MEDICINE."

"We leave uniform!— fertimed from recommending to the public any of the various Patent Medicines of the day, unless thoroughly convinced of their value. Among those we consider mostly of notice is the German Bitters, invented by Dr., Hoodand, and prepared by Dr., Jackson, in Phila delphia. One instance in particular, in which the superior virtues of this medicine has been tested, has fallen under our observation. Dazing the last summer, a son of Mr. Altraham Crabill, of this county, was very seriously afficied with Liver Complaint, and after trying in vaio various reincidies, he purchased a bortle of the Error, and after trying in vaio various reincidies, he purchased a bortle of the Error, and after using it, was so much relieved of his distressing malaly, that he procured another bottle, and is tostered ventified in a fleath.

READ FURTHER A FEW FACUS

From "The Weldon Herald," published at Weldon, N. C., January 25, 1850, which raid—
"Patent Medicines, either approxing or edit," wise. Unfortunately for the commy, and for honest and conscientious inventors and venters of these medicines, the land is becoming durated with quark preparations, that are made aften for profit, and are fit not eyelf for the dogs. In this state of things it is bard to tell which are, and which are not worth having. If a person gets an indifferent medicine the first time he purchases, he is very square or purpose and have concern, and inventors must only blame those of their number, (who ignorancy combine plain medicines together for the purpose of making money.) for the life success which attends the effort of ethe deserving."

"We believe Dr. C. M. Jackson's ' Hoofland's

the its suggests there are most excellent medicine, serving."

"We believe Dr. C. M. Jackson's 'Hoofland's German Bitters,' to be a most excellent medicine, and one that should be highly popular in these days of Temperance—for they are altogether Vegulable in their composition, without one drop, of Alcohedic Spirits in them. This medicine is innocent, but strengthening in its effects, and richly deserving of an unbounded popularity, which, when it becomes known, it will, on doubt, fully enjoy." Judge M. M. Noah said, in his "Weekly Messenger," January 6, 1850,

"Dr. Hoffland's German Bitters.—Here is a preparation which the besing pressessin the Union appear to be ubanimous in recommending, and the reason is obvious. It is made after a prescription furnished by one of the most celebrated physicians of modern times—the late Dr. Christopher Wilhelm Hoofland, professor to the University of Jera, private ply sician to the king of Prusia, and one of the greatest medical writers Germany has ever produced. He was emphatically the exemy of hundred, and therefore a medicine of which he was the inventor and endorser may be condicably relied on. He specially recommended it in liver Complaint, Dysperially recommended it in liver Complaint, Dysperially behilly, Vertigo, Acidity of the Stomach, Constitution, and all complaints arising form a disordered condition of the stomach, the liver and the intestines. Nine Philadelphia layers begives their conviction of its effects from their own and all experience. Under these circumstances of efel warranted, int only in call ing the attention of our readers to the present proportor's (Dr. C. M. Jackson's) preparation, but in recommending the article to all afflictud."
